

# **eSafety Label - Action Plan**

Action plan submitted by Zühal Keskin for Köşk Başçayır Ortaokulu - 03.02.2023 @ 14:21:47

By submitting your completed Assessment Form to the eSafety Label portal you have taken an important step towards analysing the status of eSafety in your school. Congratulations! Please read through your Action Plan carefully to see what you can do to improve eSafety further in your school. The Action Plan offers useful advice and comments, broken down into 3 key areas: infrastructure, policy and practice.

# **Infrastructure**

# **Technical security**

- > Your school system is protected by a firewall. Ensure that the provision and management of the firewall are regularly reviewed and updated, as and when required.
- An educational approach and building resilience in pupils of all ages is also key to safe and responsible online use so bring together all teachers to have a discussion on how they will talk to their pupils about being a good and safe digital citizen. See <a href="www.europa.eu/youth/EU\_en">www.europa.eu/youth/EU\_en</a> for examples of discussions that can take place in the classroom on this topic, through role-play and group games.

## Pupil and staff access to technology

- > Since staff and pupils can use their own equipment on your school network, it is important to make sure that the Acceptable Use Policy is reviewed regularly by all members of the school and adapted as necessary. It must be discussed with pupils at the start of each academic year so that they understand what is in place to protect them and their privacy, and why. Base the policy around behaviour rather than technology. Visitors must also read and sign the Acceptable Use Policy before they use the school's network.
- > It is good that in your school computer labs can easily be booked. Consider the option of integrating other digital devices into the lessons as using them provides best practise for pupils in dealing with new media. Ensure that safety issues are also discussed.

# **Data protection**

- > It is good that your school provides training materials on the importance of protecting devices, especially portable ones. Please consider sharing those with others through the in . Also ensure that your materials are regularly reviewed to ensure they are in line with the state of the latest technology.
- > You have a good policy of keeping your learning and administration environments separate. It is good to ensure that staff training on managing these environments is up to date as you continue to review your policies. Share your policy with other eSafety Label users by uploading it to your school profile.

Your new users are given a standard password and are asked to generate their own password on their first access. Passwords offer unique entry points into the school computing system and some basic rules of password security should be rigorously applied. For further information, read the fact sheet on Safe passwords at <a href="https://www.esafetylabel.eu/group/community/safe-passwords">www.esafetylabel.eu/group/community/safe-passwords</a>.
Include these rules in your Acceptable User Agreement and avoid giving new users a standard "first access"

# **Software licensing**

password.

- > Your school has set a realistic budget for software needs. This is good. Ensure that it remains this way. You might also want to look into alternatives, e.g. Cloud services or open software.
- > You need to make sure that all the software in your school is legally licensed and that copies of the licences are held centrally. You also need to check with whoever supports your IT systems that the software will not compromise system security. Your school should develop a clear policy for software acquisition and it is good practice to centralise this process wherever possible.

# **IT Management**

In your school only the head master and/or IT responsible can acquire new software. Consider putting a system into place where teachers can ask for new software in a non-bureaucratic and timely fashion. This allows teachers to create a more engaging lesson without the temptation of unauthorized copying and its inherent dangers and costs.

# **Policy**

## **Acceptable Use Policy (AUP)**

- Regularly review the Mobile Phone Policy to ensure that it is fit for purpose and that it is being applied consistently across the school. The fact sheets on Using mobile phones at school (www.esafetylabel.eu/group/community/using-mobile-device-in-schools) and School Policy (www.esafetylabel.eu/group/community/school-policy) will provide helpful information.
- > In your school policy issues are regularly discussed. This is good practice as it ensures staff and pupils are aware of them. Do pupils and staff also have to sign related documents to confirm their awareness?

## **Reporting and Incident-Handling**

Check that your School Policy includes all necessary information for teachers about handling issues when pupils knowingly or even inadvertently access illegal or offensive material online by going to the guidance set out by the teachtoday.de/en website (tinyurl.com/9j86v84). If such incidents arise in your school, make sure you anonymously fill out the eSafety Label Incident handling form (www.esafetylabel.eu/group/teacher/incident-handling) so that other schools can benefit from your experience.

#### Staff policy

It is good practice that the school policy includes information about risks with potentially non-secured devices,

such as smartphones and that reference is made to it. Consider sharing your school policy via the uploading evidence tool, also accessible through the <u>My school area</u>.

You have guidelines in your Acceptable Use Policy (AUP) on teachers' classroom usage of mobile phones.
Upload your AUP to your school profile as it is a model of good practice that can help other eSafety Label schools.

# **Pupil practice/behaviour**

- You have defined electronic communication guidelines in your Acceptable Use Policy and this would be a useful example of good practice for other schools. Can you create a tutorial about electronic communication guidelines for pupils and upload it to your school profile via your <u>My school area</u> so that other schools can benefit from your experience.
- Your school has a school wide approach of positive and negative consequences for pupil behaviour. This is good practice, please share your policy via the <u>My school area</u> of the eSafety portal so that other schools can learn from it.

# **School presence online**

- Regularly check the content of the school's online presence on social media sites to ensure that there are no inappropriate comments. Set up a process for keeping the site/page up to date, and check the fact sheet on Schools on social networks (www.esafetylabel.eu/group/community/schools-on-social-networks) for further information to make sure that good practice guidelines have been followed. Get feedback from stakeholders about how useful the profile is.
- > You have a dedicated person to monitor your school's online reputation, and this is good practice. Always be aware of any new sites that may not be immediately apparent through a regular search. Keep up to date with the latest sites and monitor these periodically, as they can be particularly damaging for schools and their pupils and staff if they present a negative viewpoint.
- Check the fact sheet on Taking and publishing photos and videos at school (www.esafetylabel.eu/group/community/taking-and-publishing-photos-and-videos-at-school) to see that your School Policy covers all areas, then upload this section of your School Policy to your profile page via your My school area so that other schools can learn from your good practice.

# **Practice**

#### **Management of eSafety**

In addition to a clear designation of responsibility to ensure that all necessary network security and user privacy checks are in place, it is essential that schools also have audit and procedural checks at regular intervals.
Without this, a school will be leaving itself vulnerable. See our fact sheet on School Policy at <a href="https://www.esafetylabel.eu/group/community/school-policy">www.esafetylabel.eu/group/community/school-policy</a>.

Although there should always be an overall lead person on eSafety just as you have in your school, everybody in the school has a shared responsibility to secure any sensitive information used in their day to day professional duties. Even staff not directly involved in data handling should be made aware of the risks and threats and how to minimise problems. Use our fact sheet Acceptable Use Policy

(<u>www.esafetylabel.eu/group/community/acceptable-use-policy-aup-</u>) to ensure that everyone plays their part in ensuring they are all the best and safest digital citizens they can be.

# eSafety in the curriculum

- > It is good that you are making a specific reference to sexting within your child protection policy as this is a growing issue that many young people are having to deal with. It is also important to ensure that you are providing appropriate education for pupils about this issue.
- > It is commendable that you are able to provide an eSafety curriculum that keeps up with emerging issues.

  Continue to make use of new resources as they are made available. Can you upload to your school profile an outline of how you design the curriculum and links to some of the resources you use this would be most helpful for other schools.
- It is good that these issues have been included in the eSafety curriculum. It is a good idea to regularly review the issues which are being covered by your eSafety education in order to ensure that new and emerging issues are covered.

#### Extra curricular activities

How do you organise peer mentoring among pupils on eSafety? Check out the resources of the <u>ENABLE project</u> and share your ideas in the <u>forum</u> of the eSafety Label community so that other schools can benefit from your experience to establish a similar approach.

# **Sources of support**

- > It is good to know that other school services are involved in eSafety issues (e.g. counsellors, psychologists, school nurse). Are they also invited to contribute to developing and regular review of your School Policy? Publish a case study about how this is managed in your school on your school profile page on the eSafety Label project website, so that others can learn from your experience.
- > It is great that you have a staff member which is knowledgable in eSafety issues who acts as a teacher of confidence to pupils.
- > It is great that in your school pupils are actively encouraged to become eSafety mentors. You might want to share your approach to strengthening this network with other teachers on the eSafety Label website via the forum or your school's profile page, so that others can replicate it.

## Staff training

- Your school makes sure that every teacher is trained on cyberbullying. Please share resources that are used in these trainings via uploading them to your <u>My school area</u>. Are you also monitoring the effect that this training had on the number of incidents?
- In your school knowledge exchange between staff members is encouraged. This is beneficiary to the whole school. Upload PowerPoints, documents or similar of knowledge exchanges on eSafety topics via the uploading evidence tool, accessible also via the Myschool area.

The Assessment Form you submitted is generated from a large pool of questions. It is also useful for us to know if you are improving eSafety in areas not mentioned in the questionnaire. You can upload evidence of such changes via the <u>Upload evidence</u> on the <u>My school area</u> section of the eSafety Portal. Remember, the completion of the Assessment Form is just one part of the Accreditation Process, because the upload of evidence, your exchanges with others via the <u>Forum</u>, and your <u>reporting of incidents</u> on the template provided are all also taken into account.
